CONTENTS OF VOLUME 219

No. 1 *November* 1971

PAGE

On the direct and crossed components of reflex responses to unilateral stimulation of the carotid body chemoreceptors in the dog. By D. S. McQueen and A. Ungar 1

Effects of calcium and magnesium on the frequency of miniature end-plate potentials during prolonged tetanization. By W. P. Hurlbut, H. B. Longenecker Jr. and Alexander Mauro . 17

The effect of metal ions and antidiuretic hormone on oxygen consumption in toad bladder. By A. W. Cuthbert and P. Y. D. Wong 39

The origin of the basal cell potential in frog corneal epithelium. By Norio Akaike. 57

Responses of vibration-sensitive receptors in the interosseous region of the duck's hind limb. By Patricia K. Dorward and A. K. McIntrye 77

Myoepithelial cell activation in the submaxillary salivary gland. By A. C. Darke and L. H. Smaje 89

Effects of descending impulses on transmission through the spinocervical tract. By A. G. Brown 103

Intracellular potentials in bull spermatozoa. By Charles Lindemann and Robert Rikmenspoel 127

Changes in the physiology and fine structure of the taenia of the guinea-pig caecum following transplantation into the anterior eye chamber. By G. Burnstock, B. J. Gannon, T. Malmfors and D. C. Rogers 139

Development of isometric tension in simian extraocular muscle. By A. F. Fuchs and E. S. Luschei 155

Excitation–contraction coupling in frog ventricle: evidence from voltage clamp studies. By M. Morad and R. K. Orkand . . 167

Frequency–response analysis of central vestibular unit activity resulting from rotational stimulation of the semicircular canals. By G. Melvill Jones and J. H. Milsum 191

PAGE

Na and Ca components of action potentials in amphioxus muscle cells. By S. Hagiwara and Y. Kidokoro 217

Excitation–contraction coupling in amphioxus muscle cells. By S. Hagiwara, Maryanna P. Henkart and Y. Kidokoro . . 233

No. 2 *December* 1971

Ultrastructure and contractures of the pigeon iris striated muscle. By G. Pilar and P. C. Vaughan 253

Central neural regulation by adrenergic nerves of the daily rhythm in hepatic tyrosine transaminase activity. By Ira B. Black and Donald J. Reis 267

The mechanical properties and heat production of chicken latissimus dorsi muscles during tetanic contractions. By S. P. Canfield 281

Permeability of lung capillaries and alveoli to non-electrolytes in the foetal lamb. By I. C. S. Normand, R. E. Oliver, E. O. R. Reynolds and L. B. Strang. With an Appendix by Keasley Welch 303

The effect of intravenous infusion of antidiuretic hormone on water intake in the rat. By Barbara J. Rolls 331

Kininogenase of the guinea-pig's coagulating gland and the release of bradykinin. By C. Moriwaki and M. Schachter . 341

The detection of gratings in narrow-band visual noise. By Barbara E. Carter and G. Bruce Henning 355

Chloride conductance in normal and myotonic muscle fibres and the action of monocarboxylic aromatic acids. By S. H. Bryant and A. Morales-Aguilera 367

Stimulation of tubero-infundibular dopamine neurones and gonadotrophin secretion. By P. J. Keller and W. Lichtensteiger 385

Release of an antidiuretic substance by bradykinin in the rat. By M. C. Harris. 403

A study of the inferior mesenteric and pelvic ganglia of guinea-pigs with intracellular electrodes. By P. J. Crowcroft and J. H. Szurszewski 421

Excitatory input from the distal colon to the inferior mesenteric ganglion in the guinea-pig. By P. J. Crowcroft, Mollie E. Holman and J. H. Szurszewski 443

PAGE

The secretory nerves of the parotid gland of the dog. By JAN HOLMBERG 463

Afferent discharges from arterial mechanoreceptors in the kidney of the rabbit. By ARIKA NIIJIMA 477

Sodium transport by perfused giant axons of *Loligo*. By P. F. BAKER, RACHEL F. FOSTER, D. S. GILBERT and T. I. SHAW . . 487

No. 3 *December* 1971

Mechanism of compensatory renal hypertrophy. By S. E. DICKER and D. G. SHIRLEY 507

Lymph flow and changes in intracellular enzymes during healing and rejection of rabbit skin grafts. By M. K. JASANI and G. P. LEWIS 525

Splanchnic nerve inhibition of gastric acid secretion and mucosal blood flow in anaesthetized cats. By J. D. REED and D. J. SANDERS 555

Mechanisms relating gastric acid secretion and mucosal blood flow during gastrin and histamine stimulation. By J. D. REED and J. R. SMY 571

The locations and activities of medullary neurones associated with ruminant forestomach motility. By R. HARDING and B. F. LEEK . 587

The independence of the temporal integration properties of individual chromatic mechanisms in the human eye. By J. KRAUSKOPF and J. D. MOLLON 611

Responses to visual contours: spatio-temporal aspects of excitation in the receptive fields of simple striate neurones. By P. O. BISHOP, J. S. COOMBS and G. H. HENRY 625

Interaction effects of visual contours on the discharge frequency of simple striate neurones. By P. O. BISHOP, J. S. COOMBS and G. H. HENRY 659

Amino acids and presynaptic inhibition in the rat cuneate nucleus. By N. DAVIDSON and C. A. P. SOUTHWICK 689

Observations on the control of stepping and hopping movements in man. By G. MELVILL JONES and D. G. D. WATT 709

Muscular control of landing from unexpected falls in man. By G. MELVILL JONES and D. G. D. WATT 729

PAGE

Further studies on prostaglandin E_1 fever in cats. By W. Feldberg and P. N. Saxena 739

The fine structural localization of cholinesterases in the carotid body of the cat. By Kathleen J. Ballard and J. V. Jones . 747

Further evidence for the involvement of microtubules in the intra-axonal movement of noradrenaline storage granules. By P. Banks, D. Mayor and D. R. Tomlinson 755

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

24–25 *September* 1971

DEMONSTRATIONS

SUBJECT INDEX

Acidosis, detection of foetal, 15*P*
Adrenergic vesicles, role of microtubules in movement of (cat), 755
Alveoli, non-electrolyte permeability in foetal lung capillaries and (sheep), 303
Amino acids, presynaptic inhibition in cuneate nucleus and (rat), 689
Anterior eye chamber, changes following transplantation of taenia of the caecum into (guinea-pig), 139
Antidiuretic hormone, effect on oxygen consumption in bladder of metal ions and (toad), 39
effect on water intake of intravenous infusion of (rat), 331
Antidiuretic substance, release by bradykinin of (rat), 403
Arterial walls, mechanoreceptors in kidney (rabbit), 477
Avian iris muscle, ultrastructure and contractures of (pigeon), 253
Avian vibration receptors, responses in interosseous region of hind limb of (duck), 77
Axons, sodium transport by perfused giant (*Loligo*), 487

Basal cell potential, origin in cornea of epithelial (frog), 57
Bladder, effect of metal ions and antidiuretic hormone on oxygen consumption in (toad), 39
Blood–brain barrier, kinetics of ^{22}Na escape from central nervous system and (*Periplaneta americana*), 24*P*
Body temperature, performance on psychometric tests and deep, 17*P*
Bradykinin, kininogenase of coagulating gland and release of (guinea-pig), 341
release of antidiuretic substance by (rat), 403

Calcium, action potential in muscle cells and (amphioxus), 217
effects on miniature end-plate potential frequency during prolonged tetanization of (frog), 17
Carbon dioxide-sensitive receptors, lower respiratory tract (chicken), 35*P*
Cardiovascular responses, effect of changes in central command during isometric exercise on respiratory and, 40*P*
Carotid body, fine structural location of cholinesterases in (cat), 747
reflex responses to unilateral stimulation of chemoreceptors of (dog), 1
Catecholamines, effect on spontaneous contractions of mesenteric lymphatics of (ox), 34*P*
Cations, effect on oxygen consumption in bladder of antidiuretic hormone and various (toad), 39
Chemoreceptors, reflex responses to unilateral stimulation of carotid body (dog), 1
Chloride conductance, action of monocarboxylic aromatic acids on normal and myotonic muscle and (goat and frog), 367
Cholic acid, effects on transport from blood to bile of conjugation of (dog), 9*P*
Cholinesterases, fine structural location in carotid body of (cat), 747
Cholinesterase inhibitors, effects on neuromuscular function of acute and chronic exposure to (man and rat), 15*P*
Chromatic mechanisms, independence of temporal integration properties of individual, 611
Circadian cycle, control mechanism for hepatic tyrosine transaminase activity during (rat), 267
Coagulating gland, release of bradykinin and kininogenase of (guinea-pig), 341
Cornea, origin of epithelial basal cell membrane potential in (frog), 57
Cuneate nucleus, amino acids and presynaptic inhibition in (rat), 689

Discharge frequency, interaction effects of visual contours on simple striate neurone (cat), 659
Distal colon, excitatory input to inferior mesenteric ganglion from (guinea-pig), 443
Dogfish, neurophysiological research and, 12*P*
Dopamine neurones, gonadotrophin secretion and stimulation of tuberoinfundibular (rat), 385
Dorsal column nuclei, projection into spinal cord of cells of, 29*P*

Epithelial basal cell, membrane potential in cornea of (frog), 57

Erythrocytes, rouleaux formation and rate of packing of, 39*P*
Excitation–contraction coupling, muscle cell (amphioxus), 233
voltage clamp studies on ventricular (frog), 167
Extraocular muscle, development of isometric tension in (monkey), 155
Eye, independence of temporal integration of individual chromatic mechanisms in, 611

Falls, muscular control of landing from unexpected, 729
Fever, production by prostaglandin E_1 of (cat), 739
Foetus, non-electrolyte permeability of lung capillaries and alveoli in (sheep), 303
Folate metabolism, reproduction and, 16*P*
Frequency response, central vestibular unit activity on semicircular canal rotation and (cat), 191

Ganglia, studies with intracellular electrodes of (guinea-pig), 421
Gastric acid secretion, relation during gastrin and histamine stimulation between mucosal blood flow and (cat), 571
splanchnic nerve inhibition of mucosal blood flow and (cat), 555
Gastrin stimulation, relation between gastric acid secretion and mucosal blood flow during (cat), 571
Gonadotrophin secretion, stimulation of tubero-infundibular dopamine neurones and (rat), 385
Grating detection, effect of narrow-band visual noise on, 355

Haemoglobin, *in vivo* oxygen capacity of, 31*P*
Heart rate, long-term measurements in middle age of, 42*P*
Heat production, mechanical properties of latissimus dorsi muscles and (chicken), 281
Histamine stimulation, relation between gastric acid secretion and mucosal blood flow during (cat), 571
Hopping movements, control of, 709
6-Hydroxydopamine, effects on development of neurogenic hypertension of (rabbit), 20*P*
Hyperaemia, mediation in skeletal muscle of functional, 25*P*
Hypertrophy, compensatory renal (rat), 507

Ileum, inhibitory effect of perivascular stimulation on isolated (guinea-pig), 38*P*
Inferior mesenteric ganglion, excitatory input from distal colon to (guinea-pig), 443
studies with intracellular electrodes of (guinea-pig), 421
Interosseous region, responses of vibration receptors in hind limb (duck), 77
Intracellular potentials, spermatozoa (bull), 127
Iris striated muscle, ultrastructure and contractures of (pigeon), 253
Isometric tension, development in extraocular muscle of (monkey), 155

Kidney, afferent discharges from arterial mechanoreceptors in (rabbit), 477
Kidney, compensatory hypertrophy of (rat), 507
Kininogenase, release of bradykinin and coagulating gland (guinea-pig), 341

Latissimus dorsi muscles, mechanical properties and heat production of (chicken), 281
Leech, uptake of sodium and potassium by (*Hirudo medicinalis*), 10*P*
Leg movements, landing from unexpected falls and muscular control of, 729
Liquid scintillation counters, processing of data from, 4*P*
Liver, [Ureyl-^{14}C]tolbutamide and [2-^{14}C]-pentobarbitone as substrates for microsomal enzyme system in, 7*P*
Lymph, intracellular enzyme changes following skin grafts in (rabbit), 525
Lymph flow, healing and rejection of skin grafts and (rabbit), 525
Lymph nodes, mast cells in, 10*P*
Lung capillaries, non-electrolyte permeability in foetal alveoli and (sheep), 303

Magnesium, effects on miniature end-plate potential frequency during prolonged tetanization of (frog), 17
Mechanical properties, heat production of latissimus dorsi muscles and (chicken), 281
Mechanoreceptors, afferent discharges in kidney from arterial (rabbit), 477
Medulla oblongata, neuronal activity associated with ruminant forestomach motility in (sheep), 587
Microtubules, role in movement of adrenergic vesicles (cat), 755

Miniature end-plate potential, effects during prolonged tetanization of calcium and magnesium on frequency of, (frog), 17
Monocarboxylic aromatic acids, chloride conductance of normal and myotonic muscle and action of (goat and frog), 367
Mucosal blood flow, relation during gastrin and histamine stimulation between gastric acid secretion and (cat), 571
splanchnic nerve inhibition of gastric acid secretion and (cat), 555
Muscle cells, excitation–contraction coupling in (amphioxus), 233
Na and Ca components of action potential in (amphioxus), 217
Muscle spindles, relative effectiveness of intra-arterial injection and bath application of substances altering excitability of, 15*P*
without γ-efferents, 28*P*
Muscle fibres, ultrastructure and contractures of iris (pigeon), 253
Myoepithelial cell, activation in submaxillary salivary gland of (cat), 89
Myotonic muscle fibres, chloride conductance and action of monocarboxylic aromatic acids on normal and (goat and frog), 367

Nasal secretion (cat), 1*P*
Neostigmine, effects of prolonged treatment with, 6*P*
Neuromuscular junction, transmitter action at, 33*P*
Norepinephrine, effect on daily rhythm of hepatic tyrosine transaminase activity (rat), 267

17β-oestradiol, specificity of anti-sera to, 21*P*
Off-line analysis, method for increasing biological signal duration to facilitate, 12*P*
Oxygen consumption, effect in bladder of metal ions and antidiuretic hormone on (toad), 39

Parotid gland, secretory nerves of (dog), 463
Pelvic plexus, studies with intracellular electrodes of ganglion cells in (guinea-pig), 421
Pentagastrin, influence upon pancreas of hypophysectomized animals of (rat), 26*P*
***p*-nitrophenylphosphate hydrolysis,** increase on lowering ionic strength of red cell membrane, 22*P*
Poison glands, fine structure of cutaneous (*Xenopus laevis*), 9*P*
Presynaptic inhibition, effects of amino acids on cuneate nucleus and (rat), 689
Prostaglandin E_1, fever produced by (cat), 739
Receptive fields, spatio-temporal aspects of discharge centres in simple striate neurones and (cat), 625
Ruminant forestomach, medullary neuronal activity associated with movements of (sheep), 587

Secretin, influence on elimination of drugs in bile of, 13*P*
Secretory nerves, parotid gland (dog), 463
Semicircular canal, neural frequency-response in vestibular nucleus to rotational stimulation of (cat), 191
Skeletal muscle, mechanical properties and heat production of (chicken), 281
Skin grafts, lymph flow and changes in intracellular enzymes following (rabbit), 525
Sodium, action potential in muscle cells and (amphioxus), 217
Sodium transport, perfusion of giant axons and (*Loligo*), 487
Spermatozoa, intracellular potentials in (bull), 127
Spinocervical tract, effects of descending impulses on transmission through (cat), 103
Splanchnic nerve, inhibition of gastric acid secretion and mucosal blood flow by (cat), 555
Stepping movements, control of, 709
Striate cortex, interaction effects of visual contours on discharge frequency of simple neurones in (cat), 659
receptive fields of simple cells in (cat), 625
Submaxillary salivary gland, myoepithelial cell activation in (cat), 89

Taenia coli, changes following transplantation into the anterior eye chamber of (guinea-pig), 139
Temporal integration, individual chromatic mechanisms in eye and independence of, 611
Tetanic stimulation, effect of calcium and magnesium on miniature end-plate potential frequency during prolonged (frog), 17

Thalamus, responsiveness to visual stimuli of single neurones in (cat), 32*P*

Transplantation, changes in taenia of the caecum following (guinea-pig), 139

Tubero-infundibular neurones, gonadotrophin secretion and stimulation of (rat), 385

Tyrosine transaminase activity, central neural regulation of daily rhythm of hepatic (rat), 267

Urinary composition, effect of food and water deprivation on renal and (rabbit), 18*P*

Vaginal epithelium, action of pituitary hormones on bioelectric parameters of, 19*P*

Vasopressin, effect on blood platelets of, 36*P*

Ventricle, voltage clamp studies and excitation–contraction coupling in (frog), 167

Vestibular nucleus, neural frequency-response to rotational stimulation of semicircular canals in (cat), 191

Vibration receptors, responses in interosseous region of hind limb of (duck), 77

Visual contours, interaction effects on discharge centres of simple striate neurones of (cat), 659

receptive fields of simple striate neurones and responses to (cat), 625

Visual noise, grating detection in narrow-band, 355

Voltage clamp, evidence for excitation–contraction coupling in ventricle from (frog), 167

Walking forces, platform for measuring (ox), 2*P*

Water intake, effect of intravenous infusion of antidiuretic hormone on (rat), 331
